SPLASH SCREEN

User clicks on the SFA icon which opens the splash screen.

User then give permissions for allowing to

- Take pictures and record audio *
- Access the device location **

PLEASE NOTE:

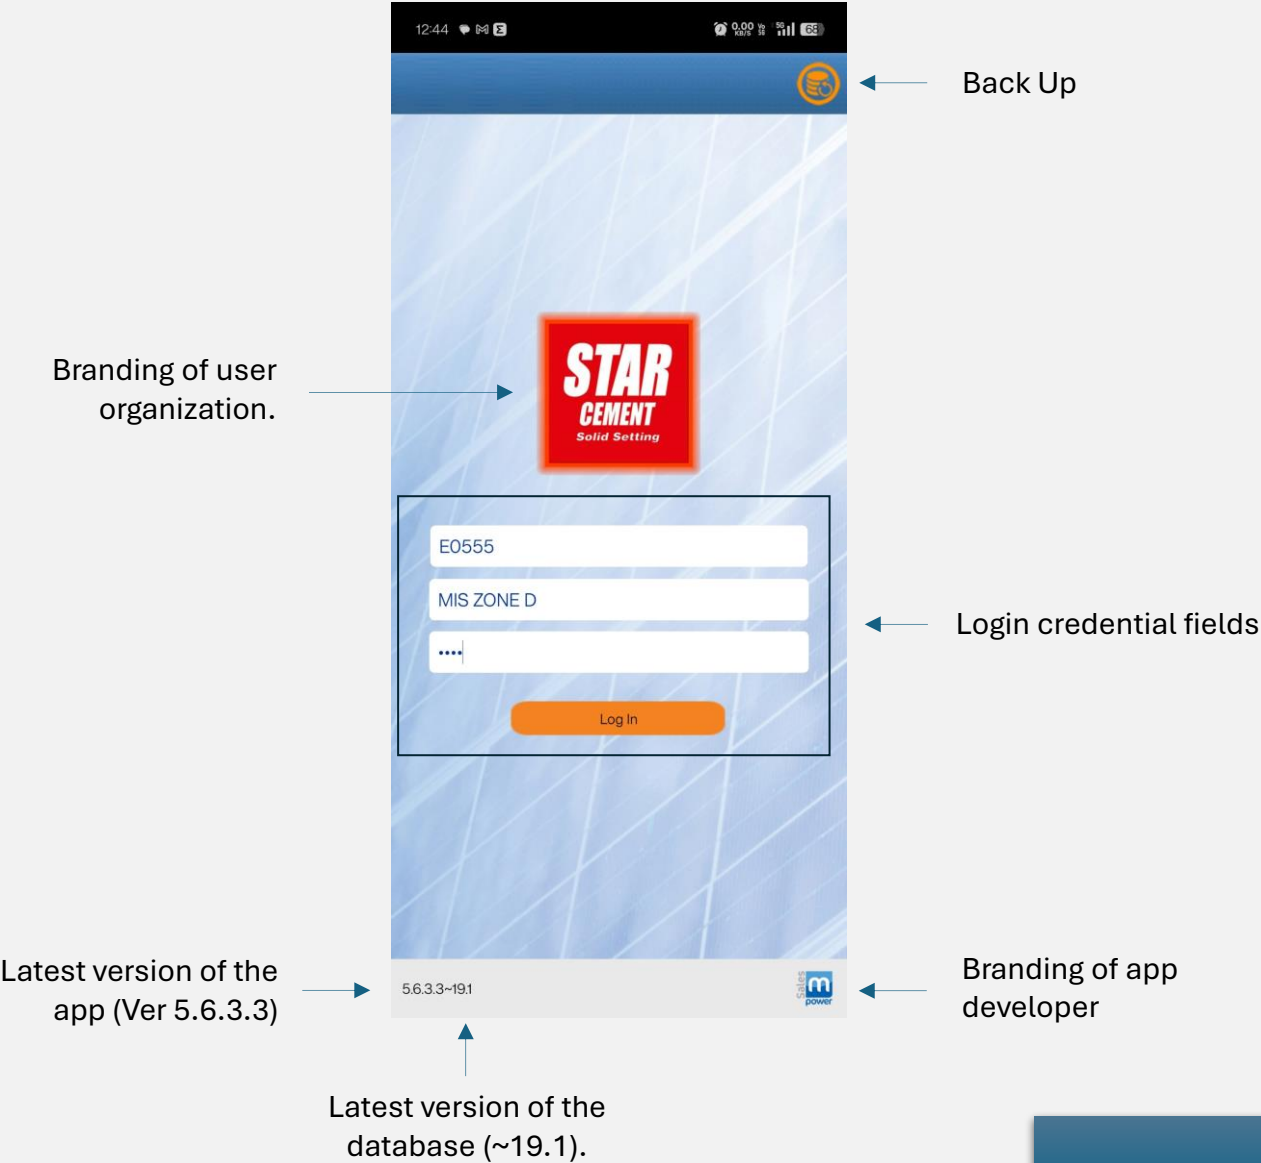

* Permission is given by the user so that user can click pictures from the app and upload as per menu requirement. No attachment is allowed.

** Permission is required so that user's latitude and longitude can be recorded on real time basis from the app.

Lat, long along with user id is getting recorded in the app.

LOGIN SCREEN

Description of the login screen

PLEASE NOTE:

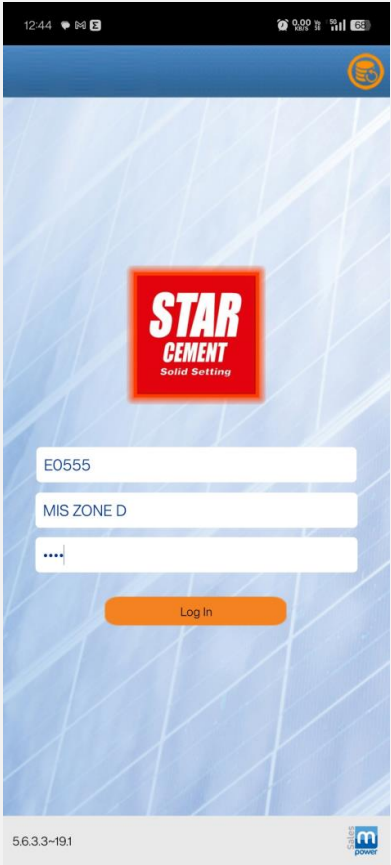

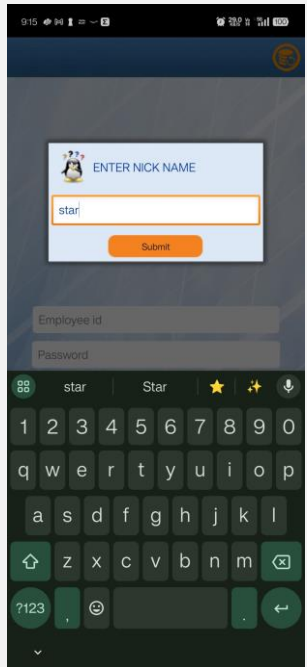

All the system information gets unloaded to the server. If

LOGIN SCREEN

User provides fixed nick name as “star”, then gives his “SFA ID” and “Password” to log into the app.

At the time of login, we can see the latest version of the app (Ver 5.6.3.3)

Once all the database fields gets downloaded we can then see the latest version of the database (~19.1).

PLEASE NOTE:

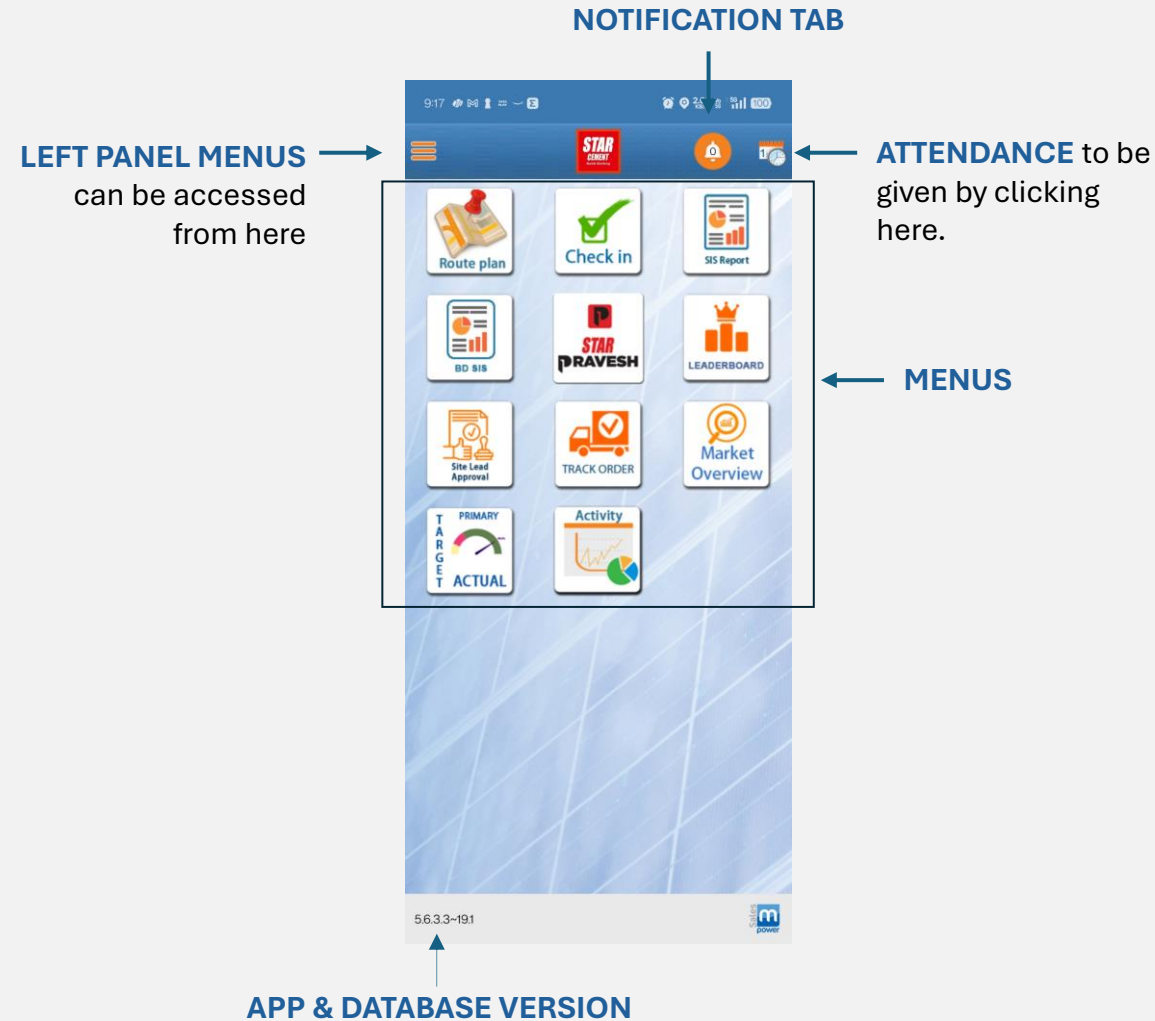

- If any problem arises and user is not able to login, then the user can take **back up** from the login screen also.

All the system information gets uploaded to the server if backup is done.

HOME SCREEN

Before accessing the app, **user has to first give the attendance which is mandatory** without which the menus cannot be accessed.

Then the user has to create a **Route Plan which is mandatory** after which the user continues with the daily work.

PLEASE NOTE:

- If any problem arises and user is not able to use the app, user can take **back up** present in the left panel.
- Due to internet connectivity issue, data error is shown when certain tables and its data have not properly downloaded or uploaded. It can be solved by accessing the "**Synchronize Data**" option present in the left panel.

< BACK TO INDEX

Once attendance is clicked, the details of user's lat, long and Time In gets recorded in the server.

HOME SCREEN

ATTENDANCE

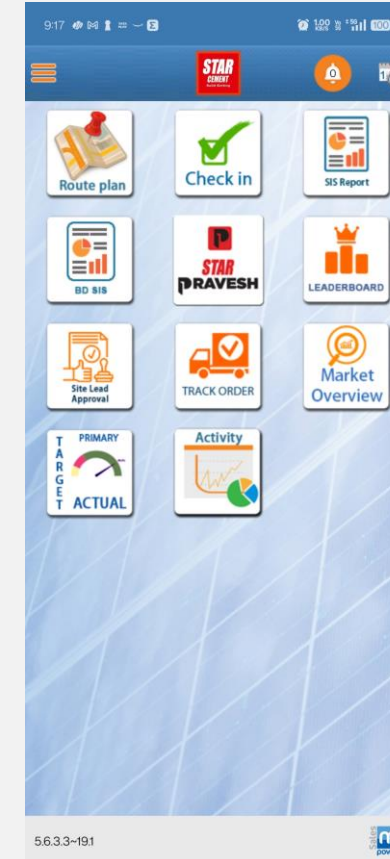

Before accessing the app, **user has to first give the attendance which is mandatory** without which the menus cannot be accessed.

The attendance turns grey and inactive after attendance is given.

If user reinstalls the app, attendance is again required to be given to access the menu but the attendance details recorded at the first instance of the day when the app is accessed is the final one.

← **ATTENDANCE** needs to be given in active position.

← **ATTENDANCE** turns grey and inactive after attendance is given.

PLEASE NOTE:

- If any problem arises and user is not able to use the app, user can take **back up** present in the left panel.
- Due to internet connectivity issue, data error is shown when certain tables and its data have not properly downloaded or uploaded. It can be solved by accessing the “**Synchronize Data**” option present in the left panel.

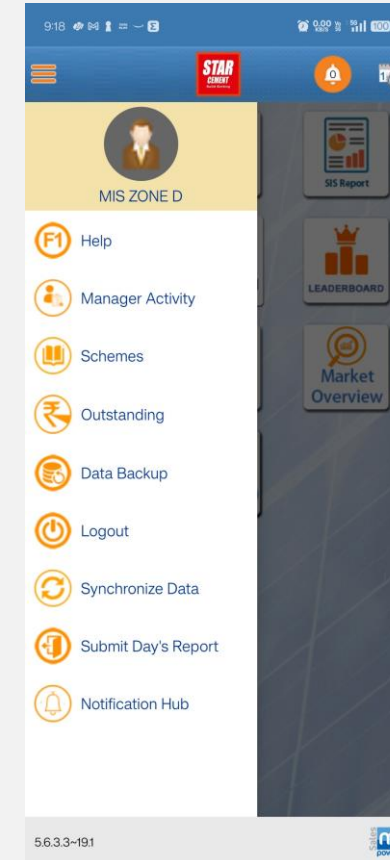

< BACK TO INDEX

Once attendance is clicked, the details of user's lat, long and Time In gets recorded in the server.

- Due to internet connectivity issue, data error is shown when certain tables and its data have not properly downloaded or uploaded. It can be solved by accessing the “**Synchronize Data**” option present in the left panel.

MENU

Route Plan

Clicking on the “**ROUTE PLAN**” icons takes you to the calendar, wherein the user selects the date. Pressing on the date shows the route to select and press submit.

Once the route is selected, the date changes to green. Long press on the date shows the routes which user has selected.

User cannot delete the route once done but can add new route.

PLEASE NOTE:

- User cannot create Route Plan for previous dates.
- User cannot delete route plan created for the present day. Only future route plans can be deleted.
- User can add new route plan for the current day.

Once attendance is clicked, the details of user's lat, long

MENU

Check In

Clicking on the “**CHECK IN**” gives the user to select “**customer**” using any one transaction type option;

1. Primary (Dealer, Exclusive Dealer)
2. Secondary (Non-Star, Sub-Dealer)

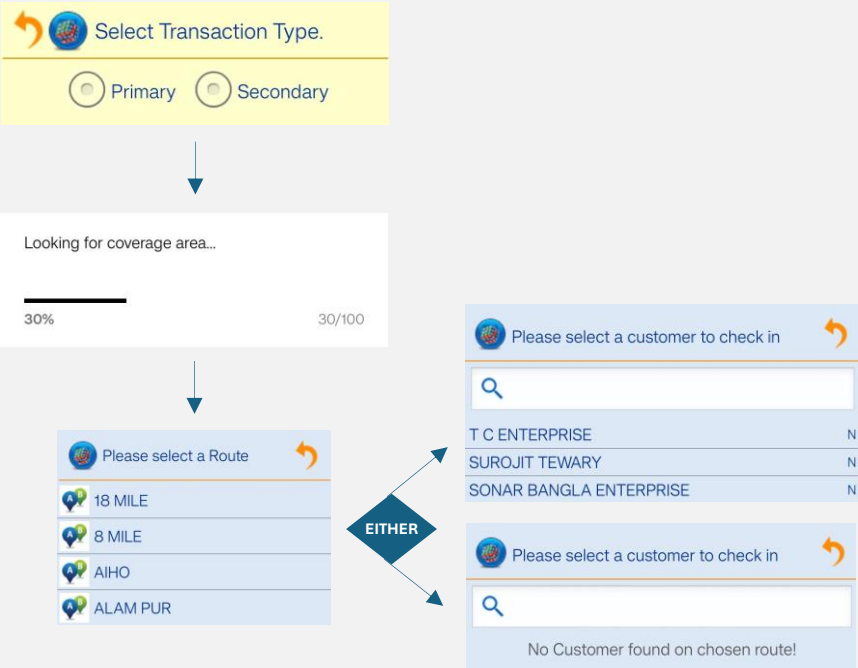

In the customer list abbreviation is used at the right hand side of the customer name;

“**N**” for Non-Star
“**E**” for Exclusive Dealer
“**D**” for Dealer

The app then searches for the coverage area as per the type of customer chosen which then shows the route to select.

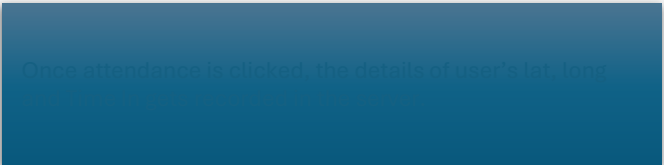

Once the route is selected, it will show you the list of customers tagged in the route.

Next slide

PLEASE NOTE:

- If blank data comes in the route, user has to check his customer mapping logic with his HO team.

MENU

Check In

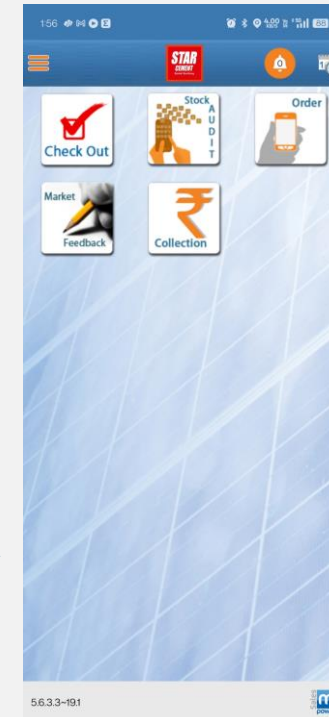

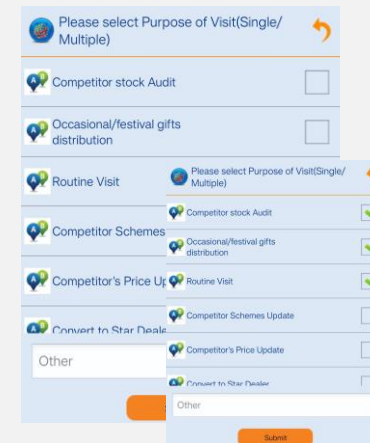

User after selecting the customer, gets to checkmark the reason for visiting the customer.

Once the user checks the reason and press submit, the Check In menus will appear.

1. Stock Audit *(Currently not in use)*
2. Order *(Currently orders are placed through Star Saathi app)*
3. Market Feedback
4. Collection

User has to do minimum one transaction before Check Out mainly;

1. Market Feedback

Next slide

PLEASE NOTE:

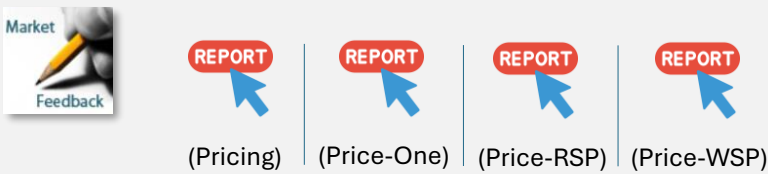

- If any issue arises then users has to synchronize the data once

MENU

Market Feedback

Market Feedback Reports

As per the type of customer, the user has chosen. The user now needs to feed the market feedback details in this menu.

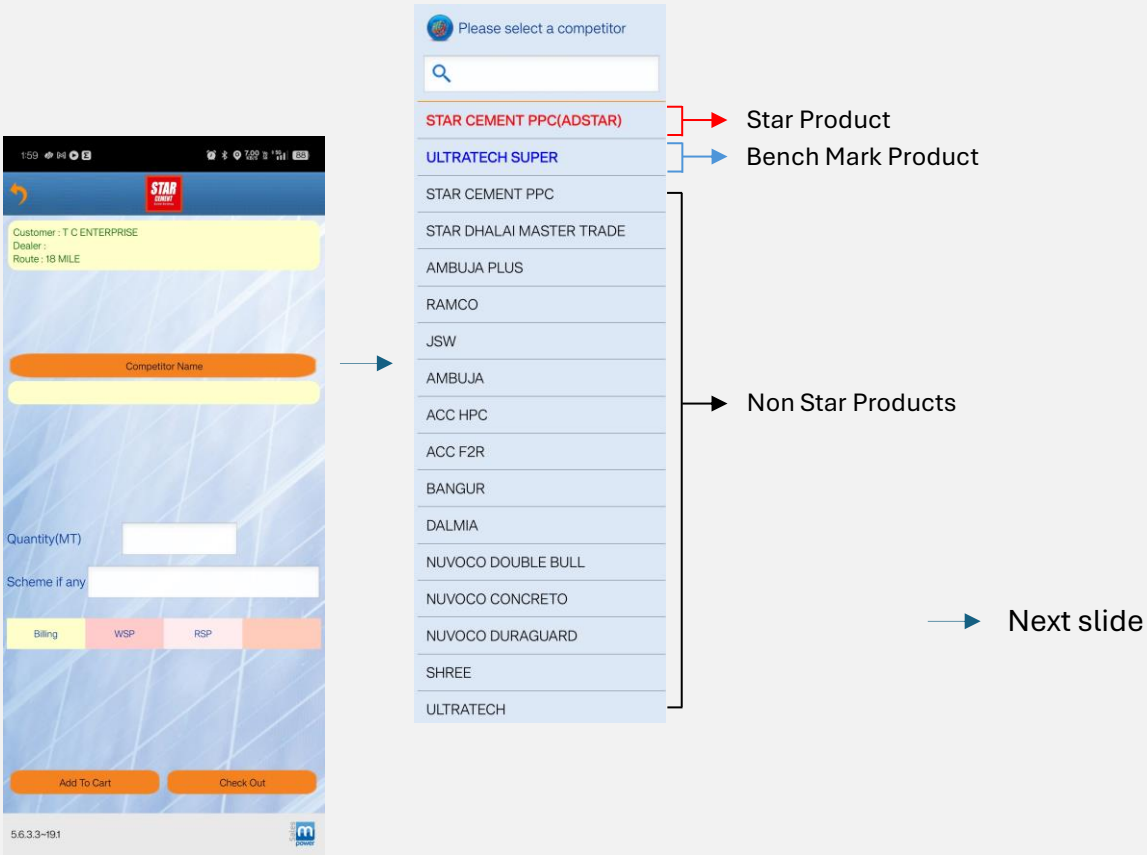

The user needs to firstly select the competitor name. The criterions that needs to be followed by the user while selecting the competitor name entirely depends upon the category of the customer;

Customer Type	Product
Exclusive Dealer	Choose one STAR Product (Mandatory), rest optional
Dealer	Choose one STAR Product (Mandatory) & atleast one Benchmark Competitor/Other Competitor
Sub Dealer	Choose one STAR Product (Mandatory) & atleast one Benchmark Competitor/Other Competitor
Non Star	Choose atleast one Benchmark Competitor/Other Competitor
Ship To Party	Choose one STAR Product (Mandatory), rest optional

If the above criterions are not met while choosing the competitor name, then the user will not be able to check out from market feedback menu.

PLEASE NOTE:

- If any issue arises then users has to synchronize the data once

MENU

Market Feedback

REPORT

After selecting the competitor name, user then provide further details;

1. Quantity (MT)
2. Scheme if any
3. Billing – While giving the value of Billing, user has to select an option EX / FOR
4. WSP – While giving the value of Billing, user has to select an option EX / FOR
5. RSP

After this user can either opt for “Add to Cart” and include more cart values if needed or can “Check Out”.

After “Check Out” user get to see the next screen having the cart screen.

Please select a Option
